Solvency and Financial Condition Report

An annual report with a common regulatory structure, yet significant variation within sections, level of detail and presentation across insurers.

[View the detailed regulatory structure ↗](#)

01 / CONTEXT

Same Structure, Different Levels of Detail

SAME

Same regulatory framework

All reports follow the same overarching rules and requirements.

Same main sections

Core sections are consistent across all reports.

Similar topics addressed

Reports cover the same key topics and subject areas.

DIFFERENT

Different report length

Total pages and depth vary significantly across reports.

Different level of detail

Some reports provide high-level summaries, others go deep.

Different writing styles

Tone, terminology, and narrative approaches differ.

Different use of tables and graphics

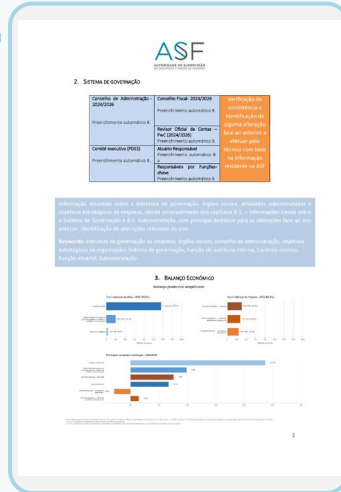

Variation in the type, complexity, and quantity of visuals.

02 / SOLUTION

Automated Outputs & Natural Language Interaction

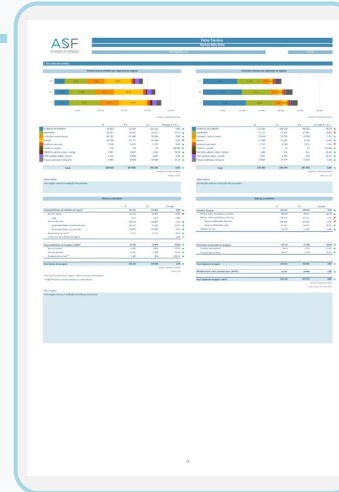

OUTPUT 1

MS Word files

OUTPUT 2

MS Excel files

PROMPT-BASED ACCESS

Natural Language Interaction

Users can query and explore SFCR information via prompts.

Ask a question about the SFCR...

01 - SOURCE

SFCR chapters & sections

02 - EXTRACT

Keywords
Key indicators
Key characteristics
Reporting period & changes

03 - CROSS REFERENCE

Cross reference
among sections & reports

02 / SOLUTION

Automated Outputs & Natural Language Interaction

Requirements to be addressed

- / **Automatic pre-filling of fields** in supervisory reports, with generation of editable .docx and .xlsx files.
- / **User validation and editing capabilities** before finalizing outputs.
- / **Storage** of generated and validated outputs for future reference and reuse.
- / **Natural language interaction** with information through prompts.
- / **Full traceability and auditability**, enabling identification of document source, undertaking, reporting period, section and page, data element source, and any transformations or calculations performed.
- / **Processing of both searchable and image-based PDFs**, ensuring extraction of relevant information.
- / **Comparative analysis capabilities**, supporting longitudinal analysis across the current and previous five reporting years, and cross-sectional analysis across different undertakings.
- / **Alerts for non-compliance** with SFCR structure.
- / **Modular and scalable architecture**, allowing the progressive integration of additional ASF reports, data sources, and document formats.

02 / SOLUTION

Benefits and Future Potential

GOALS

Faster Report Preparation

Less time spent gathering, analysing and reporting information.

Faster Insight Generation

Quicker identification of key information, trends and inconsistencies.

Integrated Cross-Referencing

Clear links between narrative and quantitative information across the SFCR.

Stronger Supervisory Analysis

More consistent, traceable and data-informed supervisory analysis.

ENABLING CAPABILITIES

Internal knowledge base

Traceable foundation for broader supervisory use

FUTURE POTENTIAL

Market-wide analysis

Historical trend analysis

Group-level consolidation
